Portfolio: https://longnguyen-vhoang.vercel.app

Address: Toronto, ON, M4Y 0E8

Technical Skill

- **Programming Language:** C/C++, Java, C#, Visual Basic, VBScript, Python
- **Front-End:** NextJS, ReactJS, AngularJS, Streamlit, Streamlit Extra, Bootstrap, jQuery, TailwindCSS, Three.JS
- **Back-End:** MS SQL Server, MySQL, MongoDB, Amazon S3, NodeJS, Express.JS, ASP.NET, Flask, Parcel
- **Testing:** Selenium, Junit, Appium, Cucumber
- **CI/CD tool:** Jenkins, YAML
- **Cloud Computer:** Microsoft Azure, AWS
- **Computer Vision and Data Science:** OpenCV, Azure AI Vision, PyTorch

WORK EXPERIENCE

QA Automation Developer (Full-time Co-op)

Ministry of Children Community and Social Services Ontario

Toronto, ON   January 2022 – August 2022

- **Preparation phase:** Researched how Selenium works and the prerequisites for executing the test cases.
- **Execution phase:** Identified and debugged failed test cases assigned by the team lead by using UFT One
- Received the tasks assigned from test case management and translated from **UFT** (using VBScript) to **Selenium** (Java)
- Developed proficient communication skills in a corporate setting by attending weekly meetings to report progress to the manager and daily chat with team members on **MS Teams**, as well as reporting bugs on the applications to the developers.
- **Completion phase:** Uploaded the code to GitHub by merging the codes to the master branch and discussing among team members to avoid merge conflict.
- Successfully conducted Continuous Integration / Continuous Deployment **(CI/CD)** using **Jenkins** to automate repetitive tasks such as building, testing, and deployment, allowing developers to define workflows by coding.

Achievements: Successfully accomplished the transition **from UFT/QTP (Micro Focus Unified Functional Testing)** to **Selenium** with a team by researching, planning, and assigning different roles for the team; also executing the transition tasks with the team

PROJECTS

LinkedIn Automation   Jan 2024 – Current

- **Automated connection requests:** The app automatically sends connection requests to people in the user's industry.
- **Job filtering and resume auto-application:** The app filters job postings based on user-defined criteria and automatically applies the user's resume to relevant job postings.
- **Automated follow-up:** The app automatically sends connection requests to people at companies where the user has applied for a job.
- **Java and Selenium-based automation:** The app is built using Java and Selenium and is designed to work with LinkedIn.com.

Jarvis Job Advisor   July 2023 – Oct 2023

- Writing a personalized cover letter based on a resume and job description is more specific.
- Technology Stack: Developed using Streamlit, Streamlit Extra, and Lottie for an interactive UI.
- Automated Cover Letters: Leverages OpenAI API to create tailored cover letters based on user resumes and job descriptions
- Resume Support: Provides actionable suggestions to enhance resumes and allows for on-system storage.
- Time-Efficiency: Designed to streamline mass job applications, saving users time.

EDUCATION

Advanced Diploma in Computer Programming & Analysis   2020 - 2023

Seneca College of Applied Arts and Technology (Graduated), Toronto, ON
